

INSPECT Item Bank:

Identifying Needs: Standards Proficiency Exams for California Teachers (INSPECT) is a one-of-a-kind test bank. The bank is composed of items that are written specifically to the California Content Standards. Items are provided by professional item writers across California who focus on quality, content accuracy, meeting grade level standards, and various difficulty levels. Each item includes clear rationales for why a student might choose each incorrect answer.

WHAT:

Why and How Analysis for Teaching (WHAT) is a process that guides grade and content level teams towards understanding "why" students miss items for particular standards and "how" to remediate. The frequency distribution of incorrect answers on each INSPECT assessment yields considerable data via the WHAT reports regarding why the student is having trouble mastering a particular standard.
